(54) AUCTION EXHIBITION MANAGEMENT METHOD

(57) Abstract:

PROBLEM TO BE SOLVED: To easily manage an object (a used car, for instance) exhibited at a plurality of auctions.

SOLUTION: An auction exhibition management method is provided with a first step for displaying an auction exhibition candidate list and a calendar region constituted of a plurality of auction exhibition object display regions with related auction places and dates, a second step for making a user designate the object to be exhibited at the auctions from the auction exhibition candidate list, a third step for making the user designate the auction exhibition object display region with related auction places and dates scheduled for exhibitions from the calendar region, and a fourth step for displaying the auction exhibition object designated by the second step in the auction exhibition object

display region designated by the third step.
